

FOR IMMEDIATE RELEASE

Tradr ETFs Surpasses \$2 Billion in Assets and Doubles AUM Since August

Reflects strong enthusiasm for the Tradr family of single-stock and calendar reset leveraged ETFs

NEW YORK, October 10, 2025 – [Tradr ETFs](#), a provider of ETFs designed for sophisticated investors and professional traders, announced that it has reached the remarkable milestone of over \$2 billion in assets under management (AUM) in just 18 months after launching. Tradr ETFs attributes this rapid growth to the successful launch of several standout ETFs that have crossed \$100 million in assets including:

- Tradr 2X Short TSLA Daily ETF (TSLQ) - \$461m
- Tradr 2X Long CRWV Daily ETF (CWVX) - \$278m
- Tradr 2X Long Innovation100 Monthly ETF (MQQQ) - \$175m
- Tradr 2X Long NBIS Daily ETF (NBEX) - \$174m
- Tradr 2X Long SMR Daily ETF (SMU) - \$158m
- Tradr 2X Long ASTS Daily ETF (ASTX) - \$146m
- Tradr 2X Long QUBT Daily ETF (QUBX) - \$104m

"We are thrilled to see such a rapid acceleration in our asset growth," said Russell Tencer, President of Tradr ETFs. "Reaching \$2 billion in just a year and half is a testament to the trust our investors place in us, as well as in the unique value proposition of our family of single-stock products as well as the industry's only calendar reset leveraged ETFs."

As a pioneer of leveraged ETFs, Tradr has rapidly gained traction with active traders, institutions and retail investors alike. The firm now offers 39 ETFs and continues to expand its product line to meet investor demand for leveraged products in innovative sectors such as quantum computing, AI infrastructure, space tech and urban mobility.

About Tradr ETFs

[Tradr ETFs](#) are designed for sophisticated investors and professional traders who are looking to express high conviction investment views. The strategies include leveraged and inverse ETFs that seek short or long exposure to actively traded stocks and ETFs.

IMPORTANT RISK INFORMATION

Tradr ETFs are for sophisticated investors and professional traders with high conviction views and are very different from most other ETFs. The Funds are intended to be used as short-term trading vehicles and pursue leveraged investment objectives, which means they are riskier than alternatives that do not use leverage because the Funds magnify the performance of their underlying security. The volatility of the underlying security may affect a Fund's return as much as, or more than, the return of the underlying security.

Investors in the fund should: (a) understand the risks associated with the use of leverage; (b) understand the consequences of seeking inverse and leveraged investment results; (c) for short ETFs, understand the risk of

shorting; (d) intend to actively monitor and manage their investment. Fund performance will likely be significantly different than the benchmark over periods longer than the specified reset period and the performance may trend in the opposite direction than its benchmark over periods other than that period.

Leverage increases the risk of a total loss of an investor's investment, may increase the volatility of the Funds, and may magnify any differences between the performance of the Funds and their reference security. The Funds seek leveraged investment results for a specific period (daily, monthly or quarterly). The exact exposure of an investment in the Fund intra-period will depend upon the movement of the reference security from the end of the prior period until the time of investment by the investor.

ETFs involve risk including possible loss of the full principal value. There is no assurance that the Fund will achieve its investment objective. Principal risks and other important risks may be found in the prospectus. Past performance does not guarantee future results.

ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. There can be no guarantee that an active trading market for ETF shares will develop or be maintained, or that their listing will continue or remain unchanged. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions and frequent trading may incur brokerage costs that detract significantly from investment returns.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds. This and other important information about the Fund is contained in the Prospectus, which can be obtained by visiting www.tradretfs.com. The Prospectus should be read carefully before investing.
